P.O. Box 15569  
Boise, ID 83715-0569

RE: Facility ID No. 777-00212, Western Construction, Incorporated, Portable  
Final Permit Letter

Dear Mr. Heaton:

The Idaho Department of Environmental Quality (DEQ) is issuing Permit to Construct (PTC) No. P-050037 to Western Construction, Incorporated, in accordance with IDAPA 58.01.01.200 through 228 (Rules for the Control of Air Pollution in Idaho).

This permit is based on your permit application received on August 10, 2005. This permit is effective immediately and replaces PTC No. 777-00212, issued June 16, 2000, the terms and conditions of which no longer apply. This permit does not release Western Construction, Inc. from compliance with all other applicable federal, state, or local laws, regulations, permits, or ordinances.

A representative of the Boise Regional Office will contact you regarding a meeting with DEQ to discuss the permit terms and requirements. DEQ recommends the following representatives attend the meeting: your facility's plant manager, responsible official, environmental contact, and any operations staff responsible for day-to-day compliance with permit conditions.

Pursuant to IDAPA 58.01.23, you, as well as any other entity, may have the right to appeal this final agency action within 35 days of the date of this decision. However, prior to filing a petition for a contested case, I encourage you to call Bill Rogers at (208) 373-0502 to address any questions or concerns you may have with the enclosed permit.

Sincerely,

Martin Bauer, Administrator  
Air Quality Division

MB/SYC/bf

Permit No. P-050037

**8. GENERAL CONDITIONS**

This permit is issued according to IDAPA 58.01.01.200, Rules for the Control of Air Pollution in Idaho, and pertains only to emissions of air contaminants regulated by the state of Idaho and to the sources specifically allowed to be constructed or modified by this permit.

This permit (a) does not affect the title of the premises upon which the equipment is to be located; (b) does not release the permittee from any liability for any loss due to damage to person or property caused by, resulting from, or arising out of the design, installation, maintenance, or operation of the proposed equipment; (c) does not release the permittee from compliance with other applicable federal, state, tribal, or local laws, regulations, or ordinances; (d) in no manner implies or suggests that the Department of Environmental Quality (DEQ) or its officers, agents, or employees, assume any liability, directly or indirectly, for any loss due to damage to person or property caused by, resulting from, or arising out of design, installation, maintenance, or operation of the proposed equipment.

This permit will expire if construction has not begun within two years of its issue date or if construction is suspended for one year.

This permit has been granted on the basis of design information presented with its application. Changes of design or equipment may require DEQ approval pursuant to the Rules for the Control of Air Pollution in Idaho, IDAPA 58.01.01.200, et seq.

## 1. PERMIT TO CONSTRUCT SCOPE

### Purpose

- 1.1 This PTC allows the facility to burn used oil as an alternative fuel in the hot mix asphalt (HMA) drum dryer. This permitting action is a PTC modification.
- 1.2 This PTC replaces PTC No. 777-00212, issued June 16, 2000, the terms and conditions of which shall no longer apply.

### Regulated Sources

Table 1.1 lists all sources of emissions that are regulated in this PTC.

**Table 1.1 REGULATED EMISSIONS SOURCES**

Source	Source Description			Emissions Control(s)
Hot-mix Asphalt Plant (HMA Drum Dryer)	Manufacturer: Gencor Industries Model 400 Type of HMA plant: Counterflow drum dryer	Max. hot-mix asphalt production rate: 400 T/hr;  Allowable burner fuel: natural gas, propane, ASTM Grade 2 fuel oil, and used oil	Drum dryer maximum rated heat input capacity: 101 MMBtu/hr	<u>Baghouse:</u> Gencor Model CFT-182 89,730 acfm @ 225 °F or 69,155 scfm @ 68 °F Stack = 3.58 ft x 4.81 ft Stack height = 32.46 ft
Asphalt Tank Heater	Manufacturer: Power Flame	Allowable fuel: ASTM Grade 2 fuel oil	Fuel consumption: 4 gal/hr	None
Generator Engine	Manufacturer: Detroit Diesel 12V-149; Rated capacity: 750 kW.	Allowable fuel: ASTM Grade 2 fuel oil	Fuel consumption: ≤ 67.7 gal/hr	None
Fugitive	NA	NA	NA	Fugitive Dust Control Plan

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: P-050037**

<b>Permittee:</b>	Western Construction, Inc.	<b>Facility ID No.</b> 777-00212	<b>Date Issued:</b>	May 17, 2006
<b>Location:</b>	Portable			

**2. HOT-MIX ASPHALT PLANT****2.1 Process Description**

Stockpiled aggregate and soil fines are conveyed to a rotary kiln drum drier where they are dried, heated, and combined with asphalt cement to produce asphalt. The asphalt is either loaded to trucks for transport off site, or transferred to silos for temporary storage.

**2.2 Emissions Control Description**

Particulate matter (PM) emissions from the hot-mix asphalt drum dryer are controlled by a baghouse.

# AIR QUALITY PERMIT TO CONSTRUCT NUMBER: P-050037

<b>Permittee:</b>	Western Construction, Inc.	<b>Facility ID No.</b> 777-00212	<b>Date Issued:</b>	May 17, 2006
<b>Location:</b>	Portable			

## 3. STATEWIDE REQUIREMENTS

The permittee shall comply with the following conditions when the portable hot-mix asphalt plant is operated anywhere (i.e. attainment, or unclassifiable areas) within the state of Idaho.

### **Emissions Limits**

#### **3.1 Opacity Limit (40 CFR 60, Subpart I)**

Visible emissions from the hot-mix asphalt facility shall not exhibit 20% opacity, or greater in accordance with 40 CFR 60.92(a)(2). Opacity shall be determined using EPA method 9.

For the purpose of 40 CFR 60, Subpart I, a hot-mix asphalt facility is comprised only of any combination of the following: dryers; systems for screening, handling, storing, and weighing hot aggregate; systems for loading, transferring, and storing mineral filler, systems for mixing hot mix asphalt; and the loading, transfer, and storage systems associated with emission control systems.

#### **3.2 Opacity Limit (IDAPA)**

Emissions from any stack, vent, or other functionally equivalent opening shall not exceed 20% opacity for a period or periods aggregating more than three minutes in any 60-minutes in accordance with IDAPA 58.01.01.625. Opacity shall be determined using the procedures contained in IDAPA 58.01.01.625.

#### **3.3 Hot Mix Asphalt Facility PM Grain Loading Emissions Limit (40 CFR 60, Subpart I)**

In accordance with 40 CFR 60.92(a), on and after the date on which the performance test required to be conducted by 40 CFR 60.8 is completed, no owner or operator subject to the provisions of 40 CFR 60, Subpart I shall discharge or cause the discharge into the atmosphere from any hot-mix asphalt facility any gases which contain particulate matter in excess of 90 mg/dscm (0.04 gr/dscf).

#### **3.4 Criteria Pollutant Emissions Limits**

The PM<sub>10</sub> and CO emissions from the hot-mix asphalt plant drum dryer stack, the generator stack, and the tank heater stack, combined, shall not exceed any corresponding emissions rate limits listed in Table 3.1.

**Table 3.1 EMISSIONS STANDARD & LIMITS**

Collocation Scenario	PM <sub>10</sub> (lb/Day) <sup>a</sup>	CO (T/Yr) <sup>b</sup>
Non-collocated in an attainment area any consecutive 12-month period	233.6	99.1
Collocated in an attainment area in any consecutive 12-month period	233.6	49.5
Non-collocated in a nonattainment area in any consecutive 12-month period	87.7	98.2

<sup>a</sup>pounds per day

<sup>b</sup>tons per consecutive 12-month period

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: P-050037**

<b>Permittee:</b>	Western Construction, Inc.	<b>Facility ID No.</b> 777-00212	<b>Date Issued:</b>	May 17, 2006
<b>Location:</b>	Portable			

**3.5 Toxic Air Pollutant Emissions Limits**

The TAP emissions from the hot-mix asphalt plant drum dryer stack shall not exceed any corresponding emissions rate limits listed in Table 3.2.

**Table 3.2 EMISSIONS STANDARD & LIMITS**

<b>Pollutants</b>	<b>Non-carcinogenic TAPs (lb/day)</b>	<b>Carcinogenic TAPs (T/yr)</b>
Acetaldehyde		2.3
HCl	2.0	
Propionaldehyde	1.25	
Quinone	1.5	

**3.6 Visible Fugitive Emission Limits at Property Boundary**

Visible fugitive dust emissions shall not be observed leaving the property boundary for a period or periods aggregating more than three minutes in any 60 minute period. Visible emissions shall be determined by Method 22, which is contained in 40 CFR Part 60 Appendix A, or by a DEQ-approved alternative method.

***Operating Requirements*****3.7 Hot-Mix Asphalt Production Limits and Generator Engine Operation Hours**

Asphalt production rates and the generator engine operating hours are limited to ensure compliance with Permit Conditions 3.4 and 3.5. Respective operating requirements have been established according to different collocation scenarios and area attainment status. They are specified in Sections 4, 5 and 6, respectively.

**3.8 Air Pollution Control Equipment- Baghouse**

Baghouse operations shall comply with the following requirements to ensure that the hot mix asphalt facility does not exceed any Permit Conditions 3.1 to 3.5.

- 3.8.1 The drum dryer baghouse shall be operated at all times during the operation of the hot-mix asphalt facility to ensure compliance with Permit Conditions 3.1 to 3.5.
- 3.8.2 The permittee shall, in accordance with manufacturer specifications, install, calibrate, maintain, and operate equipment to continuously measure the pressure differential across the drum dryer baghouse.
- 3.8.3 The permittee shall have developed an O&M manual for the drum dryer baghouse which controls the PM emissions from the hot-mix asphalt drum dryer. The O&M manual shall describe the procedures that will be followed to comply with General Provision 2 and the manufacturer specifications for the baghouse. The manual shall contain, at a minimum, the pressure drop operating range for the baghouse. The manual shall remain on site at all times and shall be made available to DEQ representatives upon request.
- 3.8.4 The pressure drop across the drum dryer baghouse shall be maintained within manufacturer and O&M manual specifications. Documentation of both the manufacturer and O&M manual operating pressure drop specifications shall remain on site at all times and shall be made available to DEQ representatives upon request.

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: P-050037**

<b>Permittee:</b>	Western Construction, Inc.	<b>Facility ID No.</b> 777-00212	<b>Date Issued:</b>	May 17, 2006
<b>Location:</b>	Portable			

**3.9 Reasonable Control of Fugitive Emissions**

All reasonable precautions shall be taken to prevent particulate matter (PM) from becoming airborne in accordance with IDAPA 58.01.01.650-651. In determining what is reasonable, considerations will be given to factors such as the proximity of dust-emitting operations to human habitations and/or activities and atmospheric conditions that might affect the movement of PM. Some of the reasonable precautions include, but are not limited to, the following:

- Use, where practical, of water or chemicals for control of dust in the demolition of existing buildings or structures, construction operations, the grading of roads, or the clearing of lands.
- Application, where practical, of asphalt, water, or suitable chemicals to, or covering of, dirt roads, material stockpiles, and other surfaces which can create dust.
- Installation and use, where practical, of hoods, fans, and fabric filters or equivalent systems to enclose and vent the handling of dusty materials. Adequate containment methods should be employed during sandblasting or other operations.
- Covering, where practical, of open-bodied trucks transporting materials likely to give rise to airborne dusts.
- Paving of roadways and their maintenance in a clean condition, where practical.
- Prompt removal of earth or other stored material from streets, where practical.

**3.10 Allowable Fuel Types**

- The fuel used in the hot-mix asphalt drum dryer shall be natural gas, propane, ASTM Grade 2 fuel oil or used oil.
- The fuel used in the electric generator engine shall be ASTM Grade 2 fuel oil.
- The fuel used in the asphalt tank heater shall be ASTM Grade 2 fuel oil.

**3.11 Collocation with any Other Hot-Mix Asphalt Facility**

This hot-mix asphalt facility shall not collocate with any other hot-mix asphalt facility.

***Monitoring and Recordkeeping Requirements*****3.12 Visible Emissions Monitoring**

The permittee shall conduct an inspection of visible emissions from the drum dryer stack during daylight hours and under normal operating conditions once during each calendar month that the hot-mix asphalt facility operates. The inspection shall consist of a see/no see evaluation of visible emissions. If any visible emissions are present from the drum dryer stack, the permittee shall either take appropriate corrective action as expeditiously as practicable, or perform a Method 9 opacity test in accordance with the procedures outlined in IDAPA 58.01.01.625. A minimum of 30 observations shall be recorded when conducting the opacity test. If opacity is greater than 20% for a period or periods aggregating more than three minutes in any 60-minute period, the permittee shall take all necessary corrective action and report the exceedance in accordance with IDAPA 58.01.01.130-136.

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: P-050037**

<b>Permittee:</b>	Western Construction, Inc.	<b>Facility ID No.</b> 777-00212	<b>Date Issued:</b>	May 17, 2006
<b>Location:</b>	Portable			

The permittee shall maintain records of the results of each visible emissions inspection and each opacity test when conducted. The records shall include, at a minimum, the date and results of each inspection and test and a description of the following: the permittee's assessment of the conditions existing at the time visible emissions are present (if observed), any corrective action taken in response to the visible emissions, and the date corrective action was taken. The monthly visible emissions inspection is not required when the facility is not in operation.

Records of each visible emissions inspection shall remain on site for the most recent two-year period and shall be made available to DEQ representatives upon request.

**3.13 Hot-Mix Asphalt Production Limits and Generator Engine Operation Hours**

The following parameters shall be monitored and recorded. Records of this information shall remain on site for the most recent two-year period and shall be made available to DEQ representatives upon request.

- Hot-mix asphalt production in tons per day, tons per month and tons per any consecutive 12 month period (tons per year). Annual production shall be determined by summing monthly production over the previous consecutive 12-month period.
- Generator engine hours of operation in hours per day, hours per month, and hours per any consecutive 12-month period (hours per year). Annual hours shall be determined by summing monthly hours over the previous consecutive 12-month period.

**3.14 Air Pollution Control Equipment- Baghouse**

The permittee shall monitor and record the pressure drop across the drum dryer baghouse once weekly when the drum dryer is operating. Records of this information shall remain on site for the most recent two-year period and shall be made available to DEQ representatives upon request.

**3.15 Performance Testing Requirements**

3.15.1 Within 60 days after achieving the maximum production rate at which the affected facility will operate, but not later than 180 days after initial start up of the source, a performance test shall be conducted on the hot-mix asphalt drum dryer stack under worst-case normal operating conditions (i.e. using the used oil in this facility) in accordance with IDAPA 58.01.01.157, General Provision 6 of this permit, and in accordance with 40 CFR 60.90 if the initial source test has not been conducted in accordance with that regulation. The performance test shall be conducted to demonstrate compliance with the applicable PM standards defined in 40 CFR 60.92 and Permit Condition 3.3. The following shall be monitored and recorded during the performance tests:

- The hourly production rate of the hot-mix asphalt plant expressed as tons per hour.
- The pressure drop across the baghouse.
- The visible emissions observed during the performance tests.

3.15.2 The permittee shall conduct performance tests of the hot-mix asphalt drum dryer stack at a frequency of no less than once every five years to demonstrate compliance with Permit Conditions 3.2 and 3.3.

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: P-050037**

<b>Permittee:</b>	Western Construction, Inc.	<b>Facility ID No.</b> 777-00212	<b>Date Issued:</b>	May 17, 2006
<b>Location:</b>	Portable			

**3.16 Reasonable Control Measures**

To demonstrate compliance with Permit Condition 3.6 and 3.9, the permittee shall conduct a monthly facility-wide inspection of potential sources of fugitive emissions during daylight hours and under normal operating conditions to ensure that the methods used to reasonably control fugitive emissions are effective. If fugitive emissions are not being reasonably controlled, the permittee shall take corrective action as expeditiously as practicable. The permittee shall maintain records of the results of each fugitive emissions inspection. The records shall include, at a minimum, the date of each fugitive emissions inspection and a description of the following: the permittee's assessment of the conditions existing at the time fugitive emissions were present (if observed), any corrective action taken in response to the fugitive emissions, and the date the corrective action was taken. The monthly inspection is not required when the facility is not in operation.

Records of each facility-wide fugitive emissions inspection shall remain on site for the most recent two-year period and shall be made available to DEQ representatives upon request.

***Reporting Requirements*****3.17 Performance Test Protocol and Performance Test Report**

The permittee shall comply with General Provision 6 with respect to the Performance Test Protocol and Performance Test Report.

**3.18 Relocation**

All existing portable equipment shall be registered. At least 10 days prior to relocation of any equipment covered by this permit, the permittee shall submit a scaled plot plan and a complete Portable Equipment Registration and Relocation Form in accordance with IDAPA 58.01.01.500 to the following address:

PERF Processing Unit  
Idaho DEQ - Air Quality  
1410 North Hilton  
Boise, ID 83706-1255

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: P-050037**

<b>Permittee:</b>	Western Construction, Inc.	<b>Facility ID No.</b> 777-00212	<b>Date Issued:</b>	May 17, 2006
<b>Location:</b>	Portable			

**4. ATTAINMENT OR UNCLASSIFIABLE AREA OPERATING REQUIREMENTS WHEN NOT COLLOCATED**

The permittee shall comply with the permit conditions in Section 3 and the following permit conditions when the hot-mix asphalt facility is operated in any attainment or unclassifiable areas, and when it is not collocated within the state of Idaho

**4.1 Asphalt Production Limits**

4.1.1 The production rate of the hot-mix asphalt facility shall not exceed 9,600 tons of HMA per day.

4.1.2 The production rate of the hot-mix asphalt facility shall not exceed 1,323,754 tons of HMA per any consecutive 12-month period.

**4.2 Electric Generator Engine Operating Limit**

4.2.1 The electric generator engine shall not operate more than 3,309 hours per any consecutive 12-month period.

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: P-050037**

<b>Permittee:</b>	Western Construction, Inc.	<b>Facility ID No.</b> 777-00212	<b>Date Issued:</b>	May 17, 2006
<b>Location:</b>	Portable			

**5. ATTAINMENT OR UNCLASSIFIABLE AREA OPERATING REQUIREMENTS WHEN COLLOCATED**

The permittee shall comply with the permit conditions in Section 3 and the following permit conditions when the hot-mix asphalt facility is to be collocated with a portable rock crushing plant or concrete batch plant within the state of Idaho.

**5.1 Asphalt Production Limits**

5.1.1 The production rate of the hot-mix asphalt facility shall not exceed 9,600 tons of HMA per day.

5.1.2 The production rate of the hot-mix asphalt facility shall not exceed 661,877 tons of HMA per any consecutive 12-month period.

**5.2 Electric Generator Engine Operating Limit**

5.2.1 The electric generator engine shall not operate more than 1,655 hours per any consecutive 12-month period.

**5.3 Number of Portable Sources**

The hot-mix asphalt facility may only collocate with either one portable rock crushing plant, or one portable concrete batch plant which has been permitted to specifically allow collocation.

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: P-050037**

<b>Permittee:</b>	Western Construction, Inc.	<b>Facility ID No.</b> 777-00212	<b>Date Issued:</b>	May 17, 2006
<b>Location:</b>	Portable			

**6. PM<sub>10</sub> NONATTAINMENT AREA OPERATING REQUIREMENTS WHEN NOT COLLOCATED**

The permittee shall comply with the permit conditions in Section 3 and the following permit conditions when the hot-mix asphalt facility is operated in any PM<sub>10</sub> nonattainment area or proposed PM<sub>10</sub> nonattainment areas within the state of Idaho.

**6.1 Asphalt Production Limits**

6.1.1 The production rate of the hot-mix asphalt facility shall not exceed 3,597 tons of HMA per day.

6.1.2 The production rate of the hot-mix asphalt facility shall not exceed 1,312,762 tons of HMA per any consecutive 12-month period.

**6.2 Electric Generator Engine Operating Limits**

6.2.1 The electric generator engine shall not operate more than 9 hours per day.

6.2.2 The electric generator engine shall not operate more than 3,282 hours per any consecutive 12-month period.

**6.3 Collocation Requirements**

The hot-mix asphalt facility shall not be collocated with another portable hot-mix asphalt plant, rock crushing plant, or concrete batch plant when located in any PM<sub>10</sub> nonattainment area.

**6.4 Sandpoint PM<sub>10</sub> Nonattainment Area**

The permittee shall not locate the hot-mix asphalt plant in the Sandpoint PM<sub>10</sub> nonattainment area. The permittee may submit an air quality permit to construct application which requests the ability to locate within the Sandpoint PM<sub>10</sub> nonattainment area.

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: P-050037**

<b>Permittee:</b>	Western Construction, Inc.	<b>Facility ID No.</b> 777-00212	<b>Date Issued:</b>	May 17, 2006
<b>Location:</b>	Portable			

**7. PERMIT TO CONSTRUCT GENERAL PROVISIONS**

1. The permittee has a continuing duty to comply with all terms and conditions of this permit. All emissions authorized herein shall be consistent with the terms and conditions of this permit and the Rules for the Control of Air Pollution in Idaho. The emissions of any pollutant in excess of the limitations specified herein, or noncompliance with any other condition or limitation contained in this permit, shall constitute a violation of this permit and the Rules for the Control of Air Pollution in Idaho, and the Environmental Protection and Health Act, Idaho Code §39-101, et seq.
2. The permittee shall at all times (except as provided in the Rules for the Control of Air Pollution in Idaho) maintain in good working order and operate as efficiently as practicable, all treatment or control facilities or systems installed or used to achieve compliance with the terms and conditions of this permit and other applicable Idaho laws for the control of air pollution.
3. The permittee shall allow the Director, and/or the authorized representative(s), upon the presentation of credentials:
  - To enter, at reasonable times, upon the premises where an emissions source is located, or in which any records are required to be kept under the terms and conditions of this permit.
  - At reasonable times, to have access to and copy any records required to be kept under the terms and conditions of this permit, to inspect any monitoring methods required in this permit, and require stack compliance testing in conformance with IDAPA 58.01.01.157 when deemed appropriate by the Director.
4. Nothing in this permit is intended to relieve or exempt the permittee from compliance with any applicable federal, state, or local law or regulation, except as specifically provided herein.
5. The permittee shall furnish DEQ written notifications as follows in accordance with IDAPA 58.01.01.211.01 and 211.03:
  - A notification of the date of initiation of construction, within five working days after occurrence;
  - A notification of the date of completion/cessation of construction, within five working days after occurrence;
  - A notification of the anticipated date of initial start-up of the stationary source or facility not more than sixty days or less than thirty days prior to such date;
  - A notification of the actual date of initial start-up of the stationary source or facility within fifteen days after such date; and
  - A notification of the initial date of achieving the maximum production rate, within five working days after occurrence - production rate and date
6. If performance testing (air emissions source test) is required by this permit, the permittee shall provide notice of intent to test to DEQ at least 15 days prior to the scheduled test date or shorter time period as approved by DEQ. DEQ may, at its option, have an observer present at any emissions tests conducted on a source. DEQ requests that such testing not be performed on weekends or state holidays.

**AIR QUALITY PERMIT TO CONSTRUCT NUMBER: P-050037**

<b>Permittee:</b>	Western Construction, Inc.	<b>Facility ID No.</b> 777-00212	<b>Date Issued:</b>	May 17, 2006
<b>Location:</b>	Portable			

All performance testing shall be conducted in accordance with the procedures in IDAPA 58.01.01.157. Without prior DEQ approval, any alternative testing is conducted solely at the permittee's risk. If the permittee fails to obtain prior written approval by DEQ for any testing deviations, DEQ may determine that the testing does not satisfy the testing requirements. Therefore, at least 30 days prior to conducting any performance test, the permittee is encouraged to submit a performance test protocol to DEQ for approval. The written protocol shall include a description of the test method(s) to be used, an explanation of any or unusual circumstances regarding the proposed test, and the proposed test schedule for conducting and reporting the test.

Within 30 days following the date in which a performance test required by this permit is concluded, the permittee shall submit to DEQ a performance test report. The written report shall include a description of the process, identification of the test method(s) used, equipment used, all process operating data collected during the test period, and test results, as well as raw test data and associated documentation, including any approved test protocol.

7. The provisions of this permit are severable, and if any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.
8. In accordance with IDAPA 58.01.01.123, all documents submitted to DEQ, including, but not limited to, records, monitoring data, supporting information, requests for confidential treatment, testing reports, or compliance certification shall contain a certification by a responsible official. The certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document(s) are true, accurate, and complete.
